

DOAN HUYNH VU LUAN

Frontend Developer

📞 0935468857 @ luandhv1406@gmail.com 📍 Ho Chi Minh City

SUMMARY

I am currently a 4th-year student seeking a Frontend Developer position, with hands-on experience gained from personal projects. I have strong skills in React.js, Next.js, Tailwind CSS, and frontend development. In the short term, I aim to use my knowledge and experience to contribute effectively to the work process, while gaining practical experience and enhancing my problem-solving skills. In the long term, I aspire to become a Fullstack Developer and advance my career in both web and mobile development.

EXPERIENCE

CNPT TECHNOLOGY JSC

📅 06/2024 - 08/2024

Followed Agile/Scrum processes and collaborated with the team using GitHub. Designed and prototyped user interfaces in Figma while managing SQL databases. Tracked progress with GitHub Issues and built responsive UIs using React, Tailwind CSS, and Ant Design.

PERSONAL PROJECTS

Riot Games Clone

📅 10/2024 - Present

Project Description

The Riot Games Clone project is a personal initiative to replicate the official Riot Games website, built to practice both frontend and backend skills, while also exploring new technologies. The website showcases Riot Games titles such as League of Legends, TFT, and Valorant, with a strong focus on creating a user-friendly interface.

Technologies: TypeScript, Tailwind CSS, Next.js, Nest.js, RTK Query, Prisma, PostgreSQL, Swiper.

Demo: <https://www.youtube.com/watch?v=7Vibs2z5HA4>

E-Learning Prep Clone Website

📅 06/2024 - 09/2024

Project Description

Developed a web-based language learning application inspired by the PREP platform, allowing users to create personalized learning paths. The project aimed to provide an effective learning experience with convenient tools for managing progress and content.

Technologies: TypeScript, Tailwind CSS, Next.js, Node.js, Express.js, MongoDB, Clerk, Swiper, ZaloPay, Postman.

Demo: <https://www.youtube.com/watch?v=q51vVldTYeE>

E-Commerce Office Fashion Website

📅 12/2023 - 04/2024

Project Description

Developed an eCommerce website focused on office wear fashion, offering a wide range of clothing items. The project was built to enhance both frontend and backend skills, integrating modern web technologies to create a responsive, user-friendly design. Additionally, the platform includes an admin page to manage revenue, users, employees, products, and order statuses.

Technologies: Tailwind CSS, React.js, Node.js, Express.js, Redux Toolkit, MongoDB, Nodemailer, Postman.
